Equation	Solution
3x - 5 > -2(x - 10)	
x^2 - 3x - 10 = 0	
(36a^12b^12)/(54a^8b^11)	
3a)/(a^2 + ab) - (5a - 3b^2)/(a^2 - b^2)	
sin(x) + cos(x) = 1	
2x + 3i = 1 - 4i	
(a/b) + (c/d) = (e/f)	
x^3 - 4x^2 + 5x - 2 = 0
